PROJECTS

Project – 1

Title : Thermo-Hydraulic Performance of a Plate Heat Exchanger using Hybrid Nano-fluids.

Description : This Project is used to analysis of Heat transfer rates in heat exchangers under certain temperatures ranges & volume fractions. By this project we are given conclusion as hybrid Nano-fluids are more efficient then water/Oil for Heat transfer rate. We are done this Project by CFD software analysis.

Project – 2

Title : Automatic Bike side Stand removal Mechanism

Description : Automatic Bike side Stand removal Mechanism is one of the promising technique Mechanism employed for bikes in order to get minimize the bike accidents. We are using Levar rod, Push rod & intermediate sprocket, which are connected through chain drive to hit the side stand whenever chain drive moves forward, by that stand lifted.
